

Dear host family,

First of all, I'd like to thank you that you take the time to read my letter. I'm so excited to write to you and give you a better idea of who I am, I'll bring you closer to my life here, my wishes, family, friends, and of course myself.

Hi, my name is Din. I'm friendly and talkative person and most of my friends said that I'm kind person. I like to hang out with my friends like going to the cinema, playing basketball and I like to find something delicious to eat with my friends. So, I think that my special skill is easy to understand a lesson especially mathematics class. I'm good at mathematics. I've also won a medal in a math competition. I think that I like this subject because of my mother also like this subject. She taught me many techniques about mathematics since I was childhood. And I'm also very interested in history class too. In my free time I like to playing table tennis with my father. My motto is Just do it now. I'm in good health and not allergic to anything.

There are 4 members in my family. There is my father, my mother and my younger sister. Our family has been together for 19 years. My father and my mother are work together near our house. They are open retail or small store that near the beach. My father, he is good at languages so he can speak two languages which is Thai and English. My mother she is good at mathematics so she controls accounting and money for our business. My parent they are supporting me and my sister about business languages and accounting to take care our family business in future. When I have a problem, I'm always talk with mom because She has a better understanding of me and my problems more than my father so I decided to talk with my mother more than my father. No matter what problems, even friends or studies. I can talk with her. She always said to me that I can talk to her everything problem because she has passed it before. My family like to go out and eat dinner every weekend. Every year we have one day that all my family member gathered to worship our ancestors, and they will give some pocket money to children. Every

semester breaks my parents would take me to travel upcountry or abroad for 1 or 2 weeks.

the community that I live in is near the Beach so most of everyone's job is open seafood restaurant and bar. I think that my community is half city half rural. They have a simple life and are funny at night because we have many tourists. People in my neighborhood are very kind. In morning time most of the elderly are meet together to walk and dance near the beach for exercise. The school I'm in now is a provincial school with a thousand of student. My school is distinguished about languages. Now I'm at M.4 which is international program. There are 12 people in my class. My best friend group has 4 people but in fact, we are all close friends in the room. We like to playing basketballs in our free time. I'm at a chess Community. I've won medals in math competitions and that's something I'm proud of.

Denmark is a beautiful country and a country known for education. For me, I want to study the history of Denmark, gain friendships from friends and family host and I want to improve my language skills. Among other languages It is not the Thai language that I have communicated since childhood, but the language and accent that must be spoken in the countries I exchange. I think after I come back, I will have to improve my skills and language. I will have more confidence about life. I thought I would continue to study languages and when I went to college, I would study businesses and languages. The job that I will do after I finish college is to use my knowledge to expand my home business and open a hotel. And last thank you for reading my letter and I hope I can be part of your family and your culture. I am confident that my 1 year as an exchange student will be a good experience for me. Hopefully we can do everything together, please advise me about your culture, language and the way that I will gain experience from your side. Can't wait to meet you.

I can't wait to meet you!

With love, Din
