

Dear host family, nice to meet you!

I am Letizia and I am 16 years old. I live in Northern Italy with my mum and my sister but my family is composed by also by my father, my cats, my grandparents and some cousins...it is a big Italian family 😊

My mother is a social worker so she works with homeless people. I have quite an good relationship with her, I love to talk and communicate with her!

My father is an employee in steel wire selling company. Unfortunately I do not see him a lot because we live in two different houses, but when I am with him I always have fun! He is very introverted and in fact he does not let anyone understand him or his feelings, but I know he loves me a lot. Then there is my sister who studies at the University. Since we are both really determined sometimes we have different point of view, however I think that every time it helps us building a stronger and healthier relationship.

Finally there are my two cats: they are very fat and lazy but super adorable. Their names are Ciccio and Matilde, we have been living with them since 2009, so basically since I was 4 years old, I really love them and it is funny to play with them 😊

I attend a musical high school: music is highly important for me indeed. I have been playing the piano and the violin for five years. I enjoy going to classical music concerts alone or with my friends. Throughout my life I practiced many sports, such as swimming, skiing, artistic gymnastics and circus. Right now I am not doing any sports, however sometimes I work-out at home because I enjoy keeping myself toned.

I am not interstesting only in sport and music, but I am person who likes to discover cultures, languages and landscapes different from my own for this reason I have decided to know better Denmark, a a country that fascinates me.

As you might have guessed one of my hobbies is knowing new places, but I have many other ones: I like reading, especially fantasy and crime novels.

I absolutely love listening to music of all genres, it is funny to discover always new kinds of music. This could sound strange as a hobby but I fancy studying and learning new languages and cultures, for example I studied Korean for a period of time. Another hobby of mine is watching films and series in the original language, whatever the language is. However the most important hobby for me is practicing music, therefore playing my instruments and if you play or you like music, I would like to have a "little concert" with you, too 😊

I have a pretty strong personality. I am very determined, curious, sociable and outgoing. People always tell me that I am funny and have a sunny character! Another trait of my personality is that I am engaged in environmental matters, natural climate changes and discrimination. I am participating at a project in a youth protagonism center. It is called "talk to the future": me and other young people thought how could be the future of earth and to conclude the program we went live on youtube as a tv program...it was amazing! I think that Danish people has a strong relationship with the environment, for this reason I chose to spend my program in Denmark: I would like to learn a new language and a new culture directly in the country and it would be great to share my experience with my new host family and friends I will meet.

Thank you for reading my letter!

Have a good day,

Letizia.
