

Dear Host family, :D

Thank you for being interested in me. I am so excited to become your family member. First of all, let me introduce myself. My name is Tangmo but my friend calls me Mo and I am 15 years old. When I'm with my friends, I'm very talkative and funny, I keep my friends entertained all the time. My friends say I'm very fast, when I shower and get dressed very quickly and I'm always active to help my friends stay awake. I'm a person who cares a lot about other people's feelings and doesn't want to make anyone feel sad or feeling when I have a problem. I have some hobbies that I like to do in my free time I like to listen to music and **take the dog for a walk in the park**. So, if you have some dogs, I am willing to do that for you. Sometimes I like to make **bakery** such as scones and bread. Hopefully, I can make some for you or even we can bake it together. I saw on the movies when Christmas comes, they like to have some gingerbread. I will try to bake it because I think it is so cute and I also, definitely **I love Christmas!!**

I have a special ability in sports such as swimming. I'm not good at music, but now I'm **practicing guitar and learning to sing**, which works well because it helps me to relax myself and it likes my comfort zone when I feel tired. **My motto is "Work hard today to get the brighter future"** it helps me to push myself to study in order to make myself have a good future and do everything with my best. I would say I'm healthy and not sick at all.

About my family, there are 3 people. My father is very good at English and sports, so he wants me to be like him, and my mother is a person with a good business idea all the time and like to exercise. I will spend more time with my mother and sister, and when there is a problem, I will consult with my mother and sister. I will be very close to my mother and sister because we are often together. When I got stressful about school or life planning, I will talk to my mother. As for friends, I will tell my mom and sister because they will tell me how to resolve anything easily. She comforted and encouraged me so well that it made me feel that all these stressful things had turned into a joke. Every year we go to reunite relatives in the provinces because my mother has a house there. We meet during the Songkran festival. We will eat and pay respect to the elders and play in the water together in the family. It called the "Splash festival" I can share it with you it is so easy we just take some gun toy that can take water or even a bucket to splash water at each other. It is very good playing in summer, right?

My family lives in the city, most of them have to go to work early because of traffic jams, but on holidays everyone lives a simple life at

home when I have a problem, the neighbors are always there to help. My school is a Christian and boarding school, I am currently in grade 10, economics learning blocks. There are 20 members in my classroom. We are very close in the room because there are few people who help each other study during exams, homework and free time. We also play board games together in the classroom. I have 8 close friends in my class including me and 10 best friend other classmates, but I'm close to all my classmates because I'm friendly and easily adaptable. My school there are a lot of clubs in my school, I took a sculpture club which was vase and plate making which was so much fun and one of the clubs I attended was a marketing course on business design. I used to participate in school sports and I won 1st and 2nd place in athletics.

I'm a person who likes to **draw dreams and plan my life** ahead of time, but I think that going in exchange will allow me to discover myself what I want to do and what it is and also to learn how to do it. I knew how to adapt and live my life as a parent and to practice language after coming back from the project I thought I would study business administration and make a career as a **dog food brand owner** that I was interested in this career because Thailand rarely makes food with cute packaging like cats, including food that doesn't match the health of the dog and expensive, so I want to start doing that. It may be beneficial and make something good for animals because most people like dogs and face the same problem, my brand must be accepted by society for sure unless I succeed in work and ideas, and people use products that meet their needs.

Hopefully that my story will make you like and open your heart to be part of the family. I am looking forward to getting a good opportunity of being a part of your family. Please kindly consider me as your family, thank you for taking the time to read the letter and open your heart to us as a family member.

See you soon with love, Tang mo.
