

Hej!

Jeg er Diego,

I am a 16 years old Italian guy (I am trying to learn Danish, have you noticed?) and I write this letter because next year I will go in one of my favorites European countries, Denmark.

To introduce me in a digital letter is difficult, but I am going to accept the challenge, let's start 😊

Like I said before I am from Italy, precisely from a small city in a region in the north; I am 16 years old but I was born in 2007 in fact my birthday is on 21st December.

I absolutely love sports: football, basketball, volleyball, handball, and others.

In particular I have been playing football for 11 years and that's an important part of my life, I have been a goalkeeper since I was 6 and I support Juventus, an Italian football team 😊

Football is a great part of my life... with music; I always listen to music , every day at least a song, I have my personally playlist which I often listen in the afternoon. I used to play the trumpet but now I don't, I chose football over it.

Speaking about other hobbies I am part of the Church's club, so I am a children entertainer, in Summer but also in Winter and I really appreciate to be part of this group 😊 I also like playing videogames like Rocket League, Minecraft or FIFA on my Playstation, alone and with friends, especially in the evening, after dinner.

Rarely, after dinner I hang out with friends and sometimes I watch TV programs with my sister and mom... yes, I have a sister, now I am going to try to introduce my family in Danish:

so... Je har en far, en mor og en søster.

I hope that it is correct!

My dad is a groomer and he has a pet food shop; my mom is a state official but they have been divorced for 6 years but we all have a great relationship. My sister is younger than me, she attends middle school and she plays the flute and volleyball... but it's not finished, in fact I have also a very cute cat! 😊

She is 3 years old, white with some gray and black spots, I adore her and animals in general, I have had a dog, who's died, and six turtles, that my dad decided to sell.

Now it's time for school 😊

I am in the 11th year of a high school where I study scientific subjects and I am quite good, in particular at History and P.E. but unfortunately teachers hardly ever speak about geography, which is my favorite subject (I love knowing all the nations, the capital cities and the positions).

And that's it! This is me.

So, why have I decided to do this experience? I was really happy when I heard that there was such a incredible possibility, because I would like to go out from Italy to meet different people, to discover beautiful cultures, languages, habits... but also to exit from my comfort zone and also to test myself.

That's all.

I hope you enjoyed this letter and I can't wait to immerse myself in Danish culture!

Diego
