

Kære værtsfamilie,

I always struggle when it comes to start writing something, but I'll try my best to present my life, my family, and more important, me.

I live in a family of 6, there is my mother, her name is Mencia, she is always here for everyone. One thing I love the most about her, is that sometimes, she comes home from work with books for me, even though she knows as much as I do that I won't read them. Then, there is my father, his name is Benoît. He is always smiling and loves to talk with people. When I was a kid, he used to always help me when I had homework to do. I also have 3 brothers. The eldest is called Octave, he is in the same high school as me. My first little brother is Gabin, he is only 1 year and a half younger than me but I always loved to say that he is a little baby. My younger brother's name is Basile. We always play board games together. When we are on vacations, where always out of the house, we're else visiting family, else seeing friends, or even going to touristic places, such as museum or monuments in the cities nearby.

Lastly, the most perfect of the family, me. There is a lot of things that I love. First, I'm obsessed with music, but I only listen to it. My favorite singers are Marina, she is a bit underground. She sings some kind of pop called indie-pop. I also love other singers such as Lana del Rey, Billie Eilish, Conan Gray, Melanie Martinez, and lots of other ones. When I don't listen to music, I like to listen to podcasts.

I love taking pictures of the sky when I find it pretty, but I also love to take pictures of my friends, especially funny pictures. I love when I fall asleep with music in my ears, then waking up early in the weekend (like at 6am), and remember that it's Saturday so I can go back to sleep. I love speaking languages, and learning new ones. I love to travel and discover new cultures. In fact, I'm already learning 3 languages: English, Spanish, and Chinese, and I want to learn to speak more.

One of my favorite thing to do in vacations when me and my family are in the mountains is skiing. When we go there, it's usually with my cousins. We are a big family, I have 10 cousins added to my 3 brothers so it makes us 14 cousins. We see each other very often and the bond is always very strong between us. Even if 4 of them live in Canada, we managed to see them at least once in a year. I obviously have a favorite one. Her name is Sofía, she was born in Mexico and since she came to France, we love to see each other, even though she lives next to Paris and I'm in the South of France. Me and Sofía talk a lot by messages, and we're on call very often. In may, we are going to see Taylor Swift in Paris. I love to go at concert. Last year, I went to see a lot of French singers. I went to see Pomme, she sings

French variety, I also went to see an underground group that mostly sings in English called Hyphen-Hyphen, I also went to see M.Pokora, Jenifer, Lomepal and Emilie Simon, and I really love the atmosphere of concerts with everyone happy.

I also love to go see art exhibition. I went to see some exhibition this last year, one of Yves Klein, another one of Soulage, another of Djamel Tatah, Last summer, I went to Paris and saw an exhibition of an association between Jean Michel Basquiat and Andy Warhol at the Louis Vuitton Foundation. My favorite art genre is modern art, I really like the fact that we can all have a different perspective. Don't get me wrong I like every genre of art, I really like van Gogh's painting, my favorite is the starry night.

I love to hang out with my friends. We usually hang out in a room at school and just talk, play video games together, play board games together.

However there is also some things I don't like. First, people who ask me what school year I retake when they discover I'm one year younger than them. I hate to be late, and even worse, when I'm already late and I can't find my headphones. I also hate when in class, I touch something under the table and it turns out to be gum. I also can't stand people who screams in the bus in the early mornings. I hate when I do the dishes and there is still pasta in the sink, or the water is going out too fast and it splashes everywhere. I also hate when my friends are grumpy.

For my personality, I asked my friends and family how they see me, here are their responses:

→ My cousin Sofia: "you're tall, smart, you like sarcasm and animals, and I don't know"

→ My best friends Eurydice, Charlotte and Maya: "you are tall, funny, a bit shy, nice, open minded, kind, serious at school, smiley"

→ My mother Mencia, and my father Benoît: "you're sensitive, a bit shy, likable, funny, emphatic, a great listener you hate injustice, you're likely to be engaged in a cause, sometimes a bit lazy, I think you should have more self-esteem, you can also write that I think you're smart"

(I actually think I'm not that tall because I'm only 1 meter 80)

Thanks for reading me! Jeg kan ikke vente med at møde dig! Clément
