

Hi! I'm Agustin,

I'm a 17 year old Argentinian boy that wants to go to Denmark, I live in a very small city in the south, so the weather is not so different to Denmark's from what I've heard!

My house is beautiful, I love it, it's comfy, nicely decorated and filled with photos and memories, I have my own room, separated from my sister's, that is my safe space and the place where study and relax.

In my free time I enjoy listening to music and reading both adventure and crime stories, most recently Sherlock Holmes's novels, which are now one of my favorites, I like going out with friends and playing football in the park, I also love doing trekking and taking part in camping/nature trips, it helps me to destress and to connect with myself, more recently I went to a glacier here nearby which was one of the most exciting and demanding experiences of my life, I am a scout.

Playing sports is another activity I do with frequency, they keep me healthy and are a part of my life, I like to play football, Volleyball and more recently Archery, I wouldn't say that I'm a pro at it yet, but I'm getting there. Both my parents are teachers, my father teaches Philosophy and my mother teaches Communications, they are very passionate about their subject and I like to talk with them about it, In school my favorite subject is history, but I try to find a balance and perform well in all subjects, I have a group of friends in school but get along with pretty much everyone in my class, the high school I attend classes to is pretty far away from my house, so most of the time we go there by car.

I travelled to other countries like Chile, Colombia, Panama and Spain, and I loved the experience on each occasion, learning about different places is one of my passions, so when I travel, I try to be as open as possible to new opportunities to learn and experience, my mother is from Colombia, which means that I have a mix of different cultures and accents since , and I'm eager to learn more.

When I finish school I want to study Biomedical Engineering if possible, because it is my dream job and allows me to use my creativity and skills to help others.

I chose Denmark because of a multitude of factors, I've been told much about the beauty of its country and culture, both by friends and by members of my family who've had a similar experience as this one. I also chose Denmark because of how advanced it is as a Society and how authentic and unique its culture is. I hope this exchange program allows me to grow as a person, to help me become more independent and able to adapt and thrive in a completely different context and place.

I would like to thank my future host family for receiving me, for their kindness and I hope we can have a wonderful experience together.

AGUSTIN
